Aadhaar App Surpasses 21 Million Downloads: A New Era in Digital Identity

The Ministry of Electronics and Information Technology announced on Wednesday that the new Aadhaar App has reached over 21 million downloads within three months since its release. This milestone highlights the increasing public adoption of digital identity services provided by the app.

According to the ministry's statement, the app facilitates various services, including mobile number and address updates, without requiring users to visit physical centers. Over 2.8 million users have updated their mobile numbers, and approximately 600,000 have updated their address using the app.

Described as a 'next-generation mobile application,' the Aadhaar App is designed to offer users a secure and convenient method for managing their identity. The wide acceptance of the app indicates public trust and underscores its role in enhancing the accessibility of Aadhaar-linked services.

New Aadhaar App crosses 21 million downloads in three months, says MeitY

The Ministry of Electronics and Information Technology said the new Aadhaar App has recorded more than 21 million downloads within three months of its launch, indicating rising use of the platform for digital identity-related services.

In a statement issued on Wednesday, the ministry said the app was "bringing services to people's fingertips and making life easier." It added that users were increasingly relying on the platform to update Aadhaar-linked details remotely instead of visiting physical centres.

What are the benefits of the new Aadhaar app? Over 20 million people have downloaded it in just three months.

1w

Since the launch of the new Aadhaar App, people have been adopting it at a rapid pace. The Aadhaar App is witnessing tremendous adoption among the public; within just three months, it has been downloaded over 21 million (2.1 crore) times. This app has effectively brought Aadhaar services right to people's fingertips.

Tasks that previously required making repeated trips to an Aadhaar Center can now be easily accomplished from the comfort of one's home, thereby making people's lives significantly easier. With the help of this app, you can effortlessly perform tasks such as updating your Aadhaar mobile number and address without leaving your home.

600,000 People Have Used the App for These Tasks

The government states that the Aadhaar App is being utilized to avail of a wide range of services, including the hassle-free updating of mobile numbers and addresses. Users can perform these tasks anytime and from anywhere. To date, over 2.8 million (28 lakh) people have updated their mobile numbers using the new Aadhaar App. Similarly, approximately 600,000 people have used the app to update their addresses.
